Dr. Greg Bugbee and other pertinent town committees will present /discuss information regarding the wetland Invasive species, Phragmites and provide insight on how to eradicate these plants.
- 4) AUDIENCE OF CITIZENS
- 5) COMMUNICATIONS
- 6) COMMITTEE REPORTS
 - DAM
 - WATER QUALITY
 - FISHING
 - ACCESS & SAFETY
 - WATERSHED / WATERSHED MANAGEMENT PLAN
 - STORM WATER CULVERTS
 - COLUMBIA BOAT & WATER REGULATIONS
 - DAM EMERGENCY PLAN
 - PERMIT REVIEW
- 7) OLD BUSINESS
 - LMAC Proclamations completed
 - Phragmites - discussion continues
- 8) NEW BUSINESS
- 9) OTHER
- 10) ADJOURNMENT

Invasive Phragmites can be controlled using an integrated pest management approach which includes an initial herbicide treatment followed by mechanical removal (e.g., cutting, mowing) and annual maintenance. For large areas with dense stands of invasive Phragmites, prescribed burning used after herbicide treatment can provide additional control and ecological benefits over mechanical removal. Early detection is key to preventing large dense stands and is also more cost efficient.
