  - DAM EMERGENCY PLAN
  - PERMIT REVIEW
- 7) OLD BUSINESS
  - LMAC Proclamations moved to February
  - Phragmites - discussion continues
- 8) NEW BUSINESS
- 9) OTHER
- 10) ADJOURNMENT

Invasive Phragmites can be controlled using an integrated pest management approach which includes an initial herbicide treatment followed by mechanical removal (e.g., cutting, mowing) and annual maintenance. For large areas with dense stands of invasive Phragmites, prescribed burning used after herbicide treatment can provide additional control and ecological benefits over mechanical removal. Early detection is key to preventing large dense stands and is also more cost efficient.
