

# Szegda Farm Trails

## Trails

- Quarry Loop Trail
- Trailhead Connector (750')
- Red Multi-Use Trail (.5 mi.)
- Ridgetop Trail (.4 mi.)
- Habitat Loop (.35 mi.)

## Guidelines

**Pedestrians:** All parts of the farm are open to pedestrians with the exception of the cultivated areas - the Community Garden and the large field near Rt. 87. The boundaries of the property are marked with white-painted blazes.

**Pets:** Pets must be kept on leash, and owners should clean up after their pets.

**Horses:** Horses must be kept on the Red Multi-Use Trail.

**Bicycles:** Bikers may only use the Red Multi-Use Trail.

No motor vehicles of any kind are allowed beyond the parking areas.

**Habitat Loop (purple):** This mostly level trail passes through a variety of habitats: vernal pool wetlands, early succession fields, and hardwood forest - great for observing wildlife.

**Ridgetop Trail (yellow)** This trail climbs to the top of a rocky ridge with nice views in winter, then descends fairly steeply to a small hemlock grove and then returns below the cliffs.

**Red Multi-Use Loop:** This trail follows old farm roads along the edge of an old hayfield and then to the top of a ridge. A nice intermediate trail for cross-country skiing.

**Trailhead Connector:** This trail is mowed through a meadow, but is not blazed.
